摘要

本文通过论述中国国际政治心理学理论与实践研究的进展与问题这一内容，可以清晰直观地了解到，政治心理学这一范畴，其在西方出现是最早的，大约是 20 世纪 20 年代左右，在我国的发展兴起阶段是在 20 世纪 80 年代左右，随着我国不断地发展，在社会政治方面已经小有所成，自然政治心理学的研究也得到了一定的起色。尽管如此，或多或少还是出现一系列的问题，针对于实践研究产生的问题仍然是一团迷雾。基于此，本文重点从中国国际政治心理学理论与实践研究的进展与问题方面做出探索，并提出相关性的建议。

ABSTRACT

This article can clearly and intuitively understand the progress and problems of China's international political psychology theory and practice research. The category of political psychology is the earliest in the West, about the 1920s. Around the world, the rise of China's development was around the 1980s. With the continuous development of China, it has achieved little success in social politics, and the research on natural political psychology has also gained a certain improvement. Despite this, there are still a series of problems, and the problems arising from practical research are still a mystery. Based on this, this paper focuses on the progress and problems of China's international political psychology theory and practice research, and proposes relevant recommendations.

Keywords: China international; political psychology; theory; practice; problem; progress
